I – Reshaping of sub-fund

The Directors have decided to entirely reshape the following sub-fund which will have the following investment objective and policy as well as the following characteristics.

The Directors have decided to draw shareholders' attention to the fact that despite the reshaping of its investment policy, the sub-fund will continue to invest in worldwide equities focusing on companies that generate high dividends in order to generate income. The investment philosophy and universe will thus remain similar. The main modification will be the change in the investment management team. Indeed, the sub-fund is currently managed by a team which focuses on qualitative data pursuant to a top-down and bottom-up approach. In the future, the new investment management team will use a model of investment based on quantitative data. The Directors are convinced that the selection of securities with high dividends is more suited to the sub-fund's objectives.

- **AXA World Funds – Global Equity Income (formerly AXA World Funds – Framlington Global High Income)**

Notwithstanding the decision to reshape the sub-fund, the investment manager of the sub-fund will remain AXA Investment Managers UK Limited (London) who will sub-delegate part of its management duties (i) to AXA Investment Managers Asia (Singapore) for the Asian securities and (ii) to AXA Rosenberg Investment Management LLC for all US, Canadian and Latin-American securities.

▪ Investment objective and investment policy

In order to better reflect the investment approach of the new investment management team, the investment objective and the investment policy of the sub-fund has been redrafted as follows:

“Investment objective:

The objective of the Sub-Fund is to generate income from a broad portfolio of global equities.

Typical investors would seek to achieve a high level of income from a portfolio of listed equity and equity-related securities.

Investment policy:

The Sub-Fund will seek to achieve its objectives by investing at all times at least two third of its total net assets in global equities and equity-related instruments issued by companies which, in the Investment Manager's opinion, have the highest level of risk-adjusted dividend yield. The Investment Manager will use proprietary models to find such equities and use a systematic investment process to build a diversified and risk-controlled portfolio.

There is no predetermined geographical asset allocation and the Sub-Fund may invest its net assets in either developed or emerging markets.

The Sub-Fund may invest up to one third of its net assets in Money Market Instruments.”

The Sub-Fund will invest not more than 10% of its net assets in units of UCITS and/or other UCIs.

For hedging and efficient portfolio management purposes, the Sub-Fund may use derivatives within the limits set forth in the section “Investment Restrictions”.

The Reference Currency of the Sub-Fund is USD.

As a result of the reshaping of the investment policy of the sub-fund, the Directors have decided to change its denomination from “AXA World Funds – Framlington Global High Income into “AXA World Funds – Global Equity Income”.
